

What would you use TrustLogic for?

Anywhere an economic right can move, but a restriction, obligation, or authority has to remain. **Fifteen examples. One pattern.**

01 · CREATOR RIGHTS

Royalties that survive resale

A song or artwork license is assigned or sublicensed. Royalty, territory, term, and attribution travel with every downstream holder.

02 · SANCTIONS

Rules that apply after receipt

A holder is sanctioned after the asset is already in their wallet. The position can pause without waiting for a transfer.

03 · COURTS AND DISPUTES

Orders, liens, garnishment

A court order attaches to a position. An authorized party executes it with an audit trail, and restores it on resolution.

04 · SECURITIES

Transfer restrictions that persist

Accreditation, holding periods, and jurisdiction limits stay attached through secondary transfers.

05 · RWA / DEFI

Collateral eligibility

A tokenized fund interest is valid collateral today. Its status can be updated after deposit if eligibility changes.

06 · STABLECOINS

Reserve and backing events

If backing is impaired, affected positions can pause pending review instead of circulating as if nothing changed.

07 · PUBLIC FUNDS

Purpose-bound aid and benefits

Grants, aid, and benefits stay spendable while merchant, category, geography, and cap rules continue.

08 · INSURANCE

Proceeds and claims

Payouts stay tied to their purpose. Claims carry canonical state, fraud review, suspension, and duplicate protection.

09 · CAPITAL FORMATION

Governed draw control

Reg CF and Reg A funds, construction loans, and escrow release against vendors, budgets, and milestones.

10 · AI AGENTS

Spending within limits

An agent spends autonomously while the company keeps authority to change scope, suspend, or revoke.

11 · DATA RIGHTS

AI training licenses

A model receives training rights while the licensor keeps authority over scope, duration, and revocation.

12 · COMPENSATION

Vesting and clawbacks

Equity and bonuses can move or mature while clawback and forfeiture conditions remain enforceable.

13 · TICKETING

Resale and access rules

Price caps, transfer limits, and access windows hold through every resale.

14 · CARBON MARKETS

Retirement and double counting

A credit's retirement status and eligibility stay with it, so a second claim can be blocked.

15 · REGULATED GOODS

Lineage and chain of custody

Origin, licensing, and compliance status follow the product through each change of hands.

THE REPEATING QUESTION

The economic right moved. What still needs to remain?

A royalty? A sanctions status? A court order? A spending restriction? A revocation right?
